

FABIÁN BLANCO WUEST

Full Stack Developer

Argentina, Formosa | +54370-4790617 | fabianblancowuest@gmail.com

[LinkedIn](#) - [GitHub](#)

Full Stack Developer with experience in web development technologies such as **JavaScript, React.js, TypeScript, Next.js, Node.js, Express, HTML, CSS, Bootstrap**, and databases like **MongoDB, PostgreSQL**, and **Sequelize**. Strong skills in **Agile methodologies, Git, UX/UI, data structures, and algorithms**. Skilled in creating and maintaining scalable applications, integrating both frontend and backend, and managing data architecture. Possesses a problem-solving mindset, adaptability, and self-motivation, with an **Upper Intermediate level of English**.

EXPERIENCE:

FRONTEND DEVELOPER – MI PRIMER CASA S.A.

Mi Primer Casa S.A., Formosa, Argentina

May 2024 – Present

Responsible for the development and maintenance of the frontend of the company's systems, acting as the main interface developer.

Main responsibilities and achievements:

- **Layout and web design:** Design and development of intuitive interfaces, optimized for mobile devices and tablets, guaranteeing a fluid and accessible user experience.
- **Implementation of client logic and UI:** Development of interactive functionalities and client logic, ensuring a fluid connection between the interface and the backend.

Technologies used:

- **HTML and CSS:** Creation of responsive and adaptive visual components.
 - **JavaScript:** Development of dynamic and interactive functionalities, improving the usability and efficiency of the systems.
-

FULL STACK WEB DEVELOPER – SMAHH

International Client, Wellington, New Zealand

Aug 2023 - May 2024

Developed a responsive web application for cybersecurity service sales, designed to address real challenges in managing these services within a business environment.

- **Implemented functionalities:** Created a user authentication system, registration, form and email **submission, and ticket** management for cybersecurity services.

- **Design and navigation:** Developed sections including Landing Page, Dashboard, About, and Services with an intuitive and professional interface for clients.
- **Responsibilities:** Responsible for the UI design and development using React.js and CSS, implementing a scalable frontend architecture.

Technologies used:

- **Frontend:** JavaScript, React.js, Redux, CSS, HTML
 - **Backend:** Node.js, Express.js
 - **Database:** PostgreSQL, Sequelize
-

FRONT END DEVELOPER – THE SIMPSONS APP

Personal Project

May – Jul 2024

Developed a responsive web application based on "The Simpsons," displaying character cards with information and images. Users can explore character details, search by name, and navigate additional sections like series history and an "About Me" page.

- **UI design and development:** Created an intuitive and 100% responsive design optimized for various devices.
- **Dynamic rendering and DOM manipulation:** Implemented dynamic rendering of character cards without using JavaScript frameworks or libraries.
- **Search functionality:** Developed a character search feature with name filtering
- **API consumption and asynchrony:** Used JavaScript to consume an API, manage asynchrony, and handle data.

Technologies used:

- **Frontend:** HTML, CSS, Vanilla JavaScript, Bootstrap.
-

FULL STACK DEVELOPER – RICK AND MORTY APP

Henry Bootcamp, Buenos Aires, Argentina

Jun 2023 - Aug 2023

Developed a web application inspired by the "Rick and Morty" series, allowing users to explore and manage characters by consuming the official API.

- **Main functionalities:** Built a user authentication and registration system, character search, detailed views, saving favorites, and filtering by name and gender.
- **Navigation and user experience:** Created multiple navigation pages such as Home, About, and Favorites, ensuring a smooth user experience.
- **Technical responsibilities:** UI design with React.js and state management using Redux; backend setup with Node.js and Express; data management and querying in PostgreSQL using Sequelize.

Technologies used:

- **Frontend:** JavaScript, React.js, Redux, CSS, HTML
- **Backend:** Node.js, Express.js
- **Database:** PostgreSQL, Sequelize

TECHNOLOGIES:

- **Programming and Design Languages:** JavaScript, TypeScript, Node.js, CSS
- **Frameworks y Libraries:** React.js, Express.js, Sequelize, Bootstrap
- **Databases:** MongoDB, PostgreSQL, Sequelize
- **Tools:** Git, Insomnia, Postman, Figma, Vite, Jira, Jest, AWS
- **Agile Methodologies:** Scrum
